### Product Parameters and Configurations Table

Function description	Connections to different points of the electric safety chain		
Product model	iBL6-KIO-V6.2	Type of structure	Printed circuit board
Working voltage	DC24V DC110V AC110V	Pollution level	/
Working conditions	Ambient temperature: 0~55°C		

#### Annex instructions:

1. When the parameters listed in the table change, the new type test should be carried out.
2. If the modifications or changes occurred in the design and manufacture of products, the applicant ought to inform the original type test agency in writing, and provide the necessary technical documents. The original type test agency will confirm the effectiveness of type test report and test certificate, subsequently.
